VICTOR EZEAMA

FRONTEND/WEB DEVELOPER

Lagos, Nigeria • +234 704 948 3684 • victoropher@gmail.com

PROFESSIONAL SUMMARY

WordPress Developer and frontend-focused software developer with 4+ years of experience building, customizing, and maintaining responsive, fast, and user-friendly websites. Skilled in WordPress, Elementor Pro, WooCommerce, ACF, JetEngine, HTML, CSS, JavaScript, PHP, responsive web development, website performance optimization, SEO, and third-party integrations. Experienced with WordPress themes, plugins, page builders, hosting, DNS management, and website migrations. I've reduced average page load times from ~6s to under 2.5s and improved Core Web Vitals by ~35 points across production websites. Strong problem-solving skills with a focus on clean implementation, mobile-friendly design, technical troubleshooting, and delivering high-quality websites on schedule.

CORE SKILLS

Frontend & UI: HTML5 • CSS3 • JavaScript • Responsive/Mobile-first Design • Design Systems & Design Tokens • Accessibility • Cross-browser Testing

Mobile Development: Flutter • Dart • BLoC/Provider State Management • Firebase (Auth, Firestore, Functions, FCM, Storage) • Offline-first Architecture

Web & CMS: WordPress • Elemento Pro • Shopify • ACF • WooCommerce • JetEngine • PHP • REST APIs • Webhooks • SQLite

Performance & Quality: Core Web Vitals Optimization • Unit/Widget Testing • Debugging • Git/GitHub • GitHub Actions & Fastlane CI/CD

Tooling: Figma-to-code workflows • Claude Code • GitHub Copilot • Codex • Technical Documentation • PRD/TRD Authoring

PROFESSIONAL EXPERIENCE

Software Engineer & Mobile Developer (Contract) • Devlify Studios - Remote *Feb 2025 – Nov 2025*

- Built and maintained the UI layer of a cross-platform Flutter app serving 2,000+ active users, shipping real-time features backed by Firebase Firestore and Cloud Functions.
- Architected component/state management with BLoC/Provider, cutting UI rebuild cycles by ~30% on low-end Android devices.
- Integrated third-party SDKs (payment gateways, push notifications, analytics) into the frontend with offline-first resilience.
- Set up GitHub Actions + Fastlane CI/CD, reducing release turnaround from ~3 days to under 4 hours.
- Maintained 90%+ test coverage on UI and business logic; authored technical documentation.

Software Engineer / Web Developer • APMDC & GITS - Lagos, Nigeria *Jan 2022 – Dec 2024*

- Built the GITS Nigeria corporate website end-to-end and revamped the APMDC site's frontend for performance and accessibility.
- Improved Core Web Vitals by ~35 points on average; cut average page load from ~6s to under 2.5s through frontend optimization.
- Managed 3 production websites simultaneously at 99% uptime through proactive monitoring and automated backups.
- Implemented technical SEO and analytics integrations, growing organic search impressions ~40% over 12 months.
- Built a 20+ guide internal knowledge base; coordinated deployment/QA workflows using Jira and Zoho Desk.

Flutter Developer (Contract) • FinEdge Technologies - Remote *Mar 2023 – Sep 2023*

- Shipped the frontend of a personal finance app for Android/iOS using Flutter, with Firebase Auth and Firestore real-time sync.
- Built budgeting dashboards, transaction categorization UI, push-notification reminders, and data-visualization widgets.

- Wrote unit/widget tests on critical UI and business logic, cutting post-launch bug reports over 40% vs. the prior version.

WordPress Developer (Contract) • **Jolam Parker & Excelencia Pharmacy** *Oct 2023 – Nov 2023*

- Delivered two end-to-end WordPress frontend builds from scoping through launch.
- Resolved plugin conflicts, layout issues, and responsive bugs pre-launch — zero issues reported in the first 30 days.

SELECTED FRONTEND & SOFTWARE PROJECTS

NairaShield - Financial Security Application • **Flutter / Firebase** *2025 – Present*

- Designing a multi-account, multi-card financial security app (transaction monitoring, fraud alerts, emergency account/card controls, secure document storage) as a full SaaS-style MVP, from spec to shipped screens.
- Own the full product-to-implementation pipeline: PRD, TRD, App/User Flow, UI Design Brief, Backend Schema, and Implementation Plan feed directly into Claude Code for build acceleration.
- Use Claude Code to generate implementation from structured product context, then review, test, and debug output while retaining architectural control.
- Architecture: Flutter, Firebase Auth, Firestore, Cloud Functions, FCM, Storage, Remote Config, Crashlytics, Performance Monitoring, with webhook integrations planned for banking/payment providers.
- 28 screens defined across onboarding, dashboard, alerts, emergency lock, insights, vault, and profile flows. CI/CD designed with GitHub Actions and Fastlane.

STANDOUT 2027 - Conference Website & Registration Experience • **HTML / CSS / JavaScript** *2026*

- Built a multi-page conference website (event info, speakers, schedule, media centre, registration, partnerships) with a structured multi-step registration journey.
- Translated a large spec covering registration, attendance tracking, follow-up, sponsorship, and engagement requirements into a working site through rapid AI-assisted iteration.

NWELL - Artist Website • **HTML / CSS / JavaScript** *2026*

- Built a lightweight multi-page site (Home, About, Songs, Events, Contact, 404) in plain HTML/CSS/JS with no build step, for speed and portability.
- Implemented browser-side form validation and a reusable design-token structure.

VoteWatch NG - Civic Information Platform • **Web / UX / User Flows** *2025 – Present*

- Built a civic-information product concept with structured sitemap, user-flow documentation, and detailed UI screens, using the same spec-first (PRD/TRD/Flow/Backend Schema) workflow to give AI coding tools complete product context.
- Focused on turning a complex information problem into a clear, navigable product suited to rapid AI-assisted prototyping.

TaskFlow - Team Productivity Web App • **WordPress • Custom PHP • REST API**

- Built an internal project-management dashboard for a 15-person SME team: role-based views, task workflows, and a custom REST integration with a third-party time-tracking service.

PayTrack - Expense Tracking App • **Flutter • Dart • SQLite • Firebase**

- Built a personal finance app with expense tracking, budgets, spending analytics, and offline-first cloud sync.

EDUCATION

B.Sc. Computer Science - University of the People (UoPeople), Expected 2029

ADDITIONAL

Languages: English (Fluent)
Focus: Frontend architecture, mobile UI development, design systems, performance optimization, and cross-platform delivery.
